Specialisation within in this Degree/the curriculum Sustainability studies, sustainable cities, urban planning,

The degree requires an assessed period of work in practice Yes 4 months

Programme accreditation by a professional body/other institution OPQU (Office Professionnel de Qualification des Urbanistes)

This is an Erasmus mundus programme Yes

Curriculum/approach description

URB'EA focus on sustainable planning in urban areas. This formation is tightly connected to a research center for Sustainability Science in Reims University. Sustainability science addresses action on sustainable development. This presupposes a multiscale approach—temporal, spatial, and functional—, as well the inclusion of dynamic equilibria, not only of an economic, physical-chemical or biological kind, but also between actors and societies whose interests may be divergent. It correspond to use-inspired research, which is based on the postulate that the greatest scientific achievements in whatever domain take place in the framework of research applied to concrete needs of human societies. This research is, therefore, at the same time “basic” and “applied”. It is about science (natural and social) and technology for sustainability. URB'EA intends to provide the students with effective concepts and tools to cope with the new issues of sustainable planning (inclusive cities, edgeless cities, compact cities, périurbanization, local actions for the climate, ecodistricts, etc.) both from theoretical and practical, critical and normative perspectives.

Doctoral/PhD education offered at School/department

PhD -planning and sustainability- in Ecole Doctorale (Doctoral School) SHS at Reims

Number of years normally used to complete this degree(FT)	3
Part time option	Yes
Number years usually required for completing the degree part-time (PT)	6
Delivery mode	On campus
Number of ECTS	120
Teaching languages	1. French 2. English
Number of students graduated 20113	Total students 3
Specialisation within in this Degree/the curriculum	National students EU students Non EU students Sustainability studies and planning.
