The degree requires

an assessed period
Master in Conservation
of work in practice

Yes

Programme
accreditation by a
professional
body/other
institution

Sweden does not have an accreditation system for this kind of education.

This is an Erasmus
mundus programme

Yes

Curriculum/approach
description

This interdisciplinary master program is offered to students who seek knowledge in the field of conservation, assessment, planning and development of the material cultural heritage. The different courses are intended to improve the students' ability to independently identify and address complex problems and issues within the different areas of cultural heritage conservation. When specialized in built environment and conservation of built heritage, third-cycle students gain in-depth knowledge about current tools to conduct qualified analyses. The program addresses a wide array of questions, from preservation to contemporary use, planning and development, in accordance with societal aims of participation and sustainability.
