

Urban Complexity and Spatial Strategies

Towards a relational planning for our times

Patsy Healey University of Newcastle, UK

Urban Complexity and Spatial Strategies develops important new relational and institutionalist approaches to policy analysis and planning, of relevance to all those with an interest in cities and urban areas.

Well-illustrated chapters weave together conceptual development, experience and implications for future practice and address the challenge of metropolitan planning and development.

Useful for students and social scientists, *Urban Complexity and Spatial Strategies* offers concepts and detailed cases of interest to those involved in policy development and management, as well as providing a foundation of ideas and experiences, an account of the place-focused practices of governance and an approach to the analysis of governance dynamics. For those in the planning field itself, this book re-interprets the role of planning frameworks in linking spatial patterns to social dynamics with a twenty-first century relevance.

Contents

1. The Project of Strategic Planning for Urban Areas 2. Urban 'Regions' and their Governance 3. The Strategic Shaping of Urban Development in Amsterdam 4.
