Planning with Complexity
An Introduction to Collaborative Rationality for Public Policy
Judith E. Innes & David E. Booher

Analysing emerging practices of collaboration in planning and public policy to overcome the challenges complexity, fragmentation and uncertainty, the authors present a new theory of collaborative rationality, to help make sense of the new practices. They enquire in detail into how collaborative rationality works, the theories that inform it, and the potential and pitfalls for democracy in the 21st century. Representing the authors’ collective experience based upon over 30 years of research and practice, this is insightful reading for students, educators, scholars, and reflective practitioners in the fields of urban planning, public policy, political science and public administration.

About the Authors

Judith E. Innes is Professor in the Department of City and Regional Planning at the University of California, Berkeley, USA.

David E. Booher is Senior Policy Advisor and Adjunct Professor at the Center for Collaborative Policy, California State University, Sacramento, USA.
